

The image shows a large, modern indoor space, likely a train station or a public building. The ceiling is a complex, curved structure with many circular openings, some of which are illuminated by spherical pendant lights. A glass-enclosed maintenance lift is visible in the center, extending from the ground floor to the upper levels. The ground floor has a curved, tiled floor and a glass railing. In the background, there are signs for 'Kowloon Station' and 'Exit'.

高空維護升降機

LIGHTING MAINTENANCE LIFT

LF02

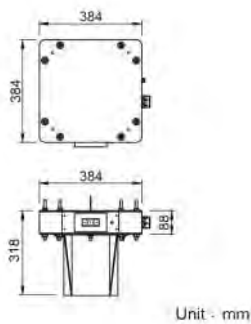

此款高空升降機是我們最先進的系統，能夠接收 DALI 訊號控制燈具明滅，荷重達 50 公斤，更能使用多頻道遙控器操作多達 32 組的升降機將懸吊於體育館、廠房、車站等高空燈具下降至地面，方便日後維護保養及燈具更換，省去高空作業的危險。

LF02 is our most advanced maintenance lift system, compatible with DALI signal, up to 50Kg lifting weight, and controlling up to 32 units with one wireless remote. It enables easy and risk-free maintenance operation for sport stadium, factories, train stations and any spaces that lighting fixtures installed at a high altitude.

產品結構 Product structure :

淨重 Net weight	27KG
升降功率 Wattage	50W
升降高度 Lift height	21M . Max
荷重 Load	8KG~50KG
額定電壓 Rated voltage	AC220V 60HZ
上升平均速率 Average rate of ascent	≤ 1.0M / min
下降平均速率 Average rate of decline	≤ 1.0M / min
遙控數量 Remote controllable quantity	32 units
遙控距離 Remote control distance	50M . Max
可支援控制系統 Supported control system	DALI

無線遙控器 Wireless remote:
